

**KÜL FUEL™**  
ALL-NATURAL REPLENISHMENT DRINK

Kül Fuel™ is an all-natural replenishment beverage specifically formulated to have the right protein-to- carbohydrate ratio together with essential vitamins and fiber. This formula is designed to meet your energy needs during physical activity as well as your recovery needs immediately after.

During training or physical activity, Kül Fuel™ can:

- Preserve muscle glycogen to ensure peak performance
- Increase stamina and reduce the decline in muscle glycogen by as much as fifty percent
- Minimize muscle damage

Immediately afterward, Kül Fuel™ can:

- Replace glycogen in your muscle and liver
- Provide protein to help rebuild and repair muscle tissue to enhance recovery

Kül Fuel™ is unlike many other commercial sports or energy drinks because it contains no high fructose corn syrup or sucrose syrup (labeled as sugar), no artificial color, flavor, preservatives or caffeine. Aspartame and saccharin free. Kül Fuel™ is the healthy, natural way to fuel and replenish your body.

It's what the active body needs....naturally.

## The Sugar Problem

In the last twenty years, sugar consumption in the U.S. has risen from 32 pounds to 161 pounds per person, per year.

Prior to the turn of the century, the average sugar consumption was only 5 pounds per person. Cardiovascular disease and cancer were virtually unknown.

More than 80 percent of our food contains high fructose corn syrup, sucrose, or fructose which is labeled as (sugar). You can find them in packaged foods, sodas, fruit juice, beer, “health bars,” sports drinks, energy drinks, and many other products.

Most companies use it because it is inexpensive and very profitable. Most health bars and sports drinks have little to no protein or minerals and vitamins.

A high consumption of sugar can lead to heart disease, diabetes, obesity, high triglycerides, depression, osteoporosis, blood clots, hyperactivity, reduction in good cholesterol (HDLs), elevation of harmful cholesterol (LDLs). It also deprives the body of minerals, vitamins and fiber.

Sugar is the number one cause of obesity among children and adults.

The average teenager drinks over 800 sodas a year. The bodies of many children are “mush” due to a diet high in fructose corn syrup, which is high in fructose and low in copper-containing foods, resulting in inadequate formation of elastin and collagen – the sinews that hold the body together.

## The Kül Fuel™ Solution

**Kül Fuel™** is designed by professional athletes for the athlete and active body with one thing in mind – giving your body what it needs during or after activities or training to get maximum recovery... not just water loaded with sugar, artificial color, flavor, and preservatives with trace of vitamin & mineral and little or no protein or other valuable nutrients.

Lifestyles and dietary habits have changed significantly over the last century as evidenced by the prevalence of weight and other health problems.

**Kül Fuel™** is designed to give your body what it needs “naturally” during or after activity or workout to fuel recovery.

What we put into **Kül Fuel™** is equally as important as what we leave out.

Taste and feel the difference – **Kül Fuel™**.
